MEMORANDUM FOR: Acting Chief, Regulations Control Staff

SUBJECT : Special Procedure for Approval of Certain
Regulatory Issuances

1. I am returning the memorandum which you submitted for the Director's consideration, which would have changed the manner of securing his approval on those regulations or delegations of authority which he must personally sign.

2. Since the preparation of this memorandum, several other possibilities have been considered, including the possibility of not approaching the Director with a formal paper but using a procedure for securing his approval which would be suitable to the particular regulation being processed. For example, the Director in one instance might be requested to read and approve the entire regulation; in another instance he might be requested to read and approve only particular paragraphs; and in still a different situation he may be requested to sign a separate document, the provisions of which could be later included in an Agency issuance by the Deputy Director (Support) without further reference to the Director.

3. Before this paper, or a similar one, is submitted to the Director, I would like to talk, once again, with you and with on this whole problem. Would you therefore arrange with for a meeting with me, at which could also be present.
